

Editorial to the twelfth issue of the International Journal of Geoscience, Engineering and Technology

We present the twelfth edition of the International Journal of Geosciences, Engineering and Technology, in which the selected articles contribute to the advancement of research in various areas of science and technology.

The mission of this journal is to disseminate research initiatives and results, with an effort focused on structuring and consolidating scientific thought in the areas of Geosciences, Engineering, and Technology.

The International Journal of Geosciences, Engineering and Technology is an interdisciplinary journal of the Graduate Program in Technology, Environment and Society of the Federal University of Vales do Jequitinhonha and Mucuri (PPGTAS/UFVJM).

Advances in science education are based on research and its publications and should be an integral part of the academic world, including the dissemination of research and the publication of articles with all their respective results.
